

AnnaLyze

**DATA SCIENCE
IN THE INDUSTRY**

RISC
Software GmbH
www.risc-software.at

THE VIRTUAL PRODUCTION ASSISTANT FOR YOUR COMPANY

The use of AnnaLyze guarantees a better understanding of your production by recognizing the relationship between cause and effect. By combining a wide range of data from sensor networks, production, configuration and tool data with the domain knowledge of your engineering team, AnnaLyze can help you to understand your production processes. The quality of your machines can be improved by using the underlying machine model.

RISC Software GmbH meets the current requirements of modern data management and offers with AnnaLyze an individually adaptable virtual production assistant for knowledge generation of your machines

DATA ENGINEERING

Linking and preparing different data sources from process and production data

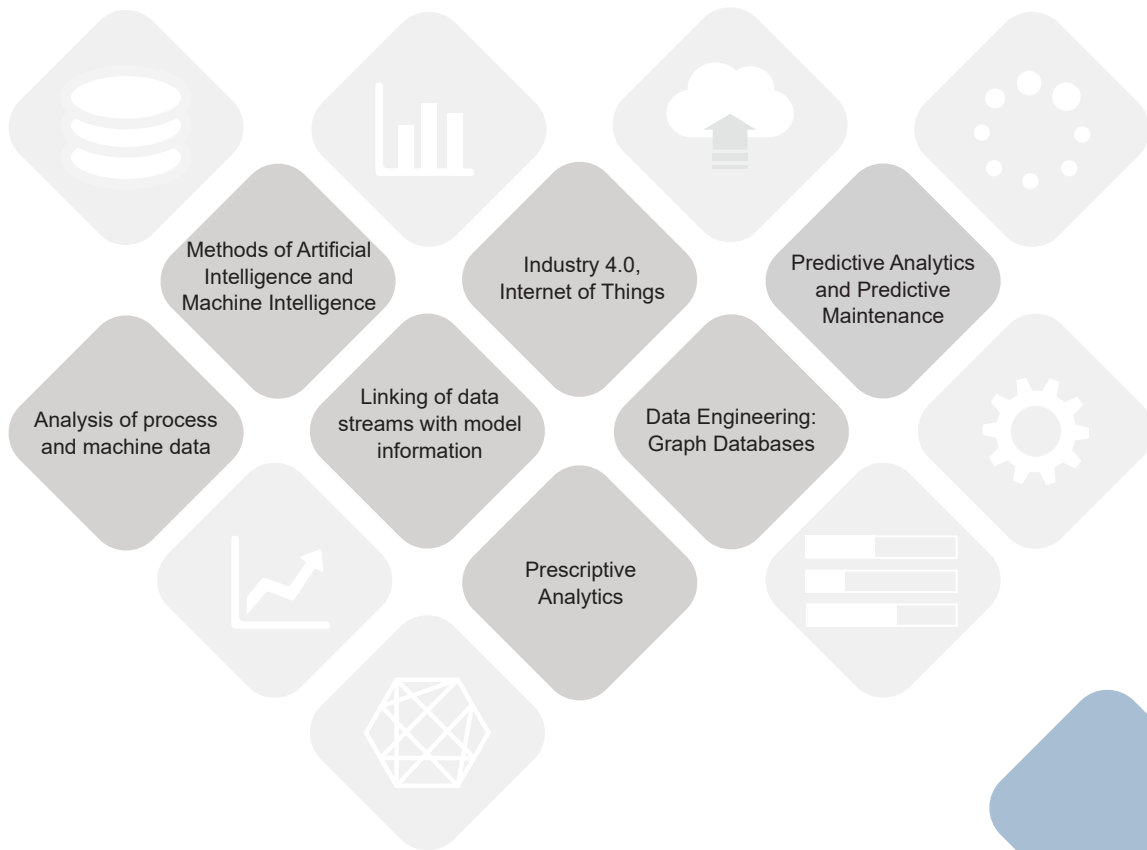

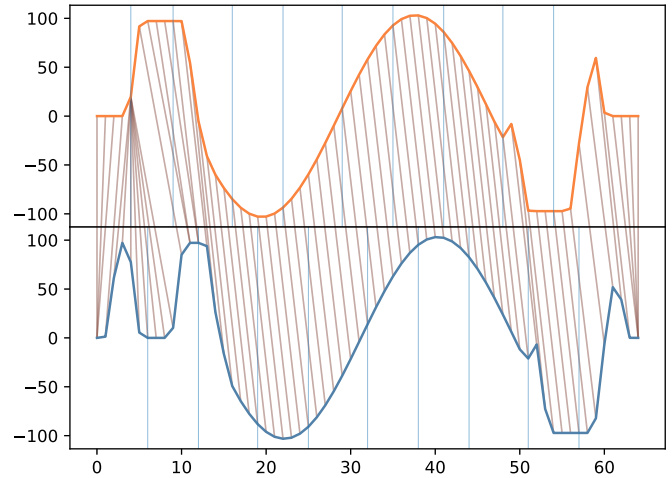

DATA ANALYTICS

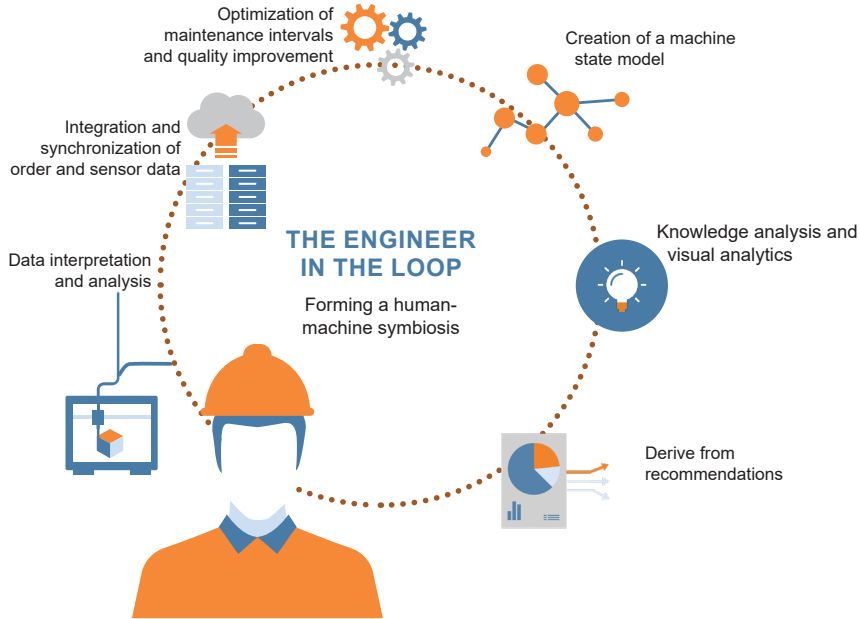

Statistical procedures, methods from data and visual analytics and machine learning

DATA PRESENTATION

Artificial Intelligence and Predictive Analytics for accurate forecasts and recommendations for action

**THE USE OF AnnoLyze GUARANTEES
A BETTER UNDERSTANDING OF YOUR
MACHINERY BY IDENTIFYING COURSE-
AND-EFFECT RELATIONSHIPS.**
